

We are experts in tomorrow's education tools and strategies

# MOVING FORWARD WITH E-LEARNING

We help your education organization or your company tackle the challenges of e-learning.

We are experts in defining strategies for going online. We implement Learning Management Systems that centralize your learning content and deliver it to your learners' communities.

## Why choose e-learning?

### ANYTIME ANYWHERE ACCESS

Because your learning content is Internet-based, it is available 24/7, and users only need a computer and an Internet connection to access it. This is particularly useful for large-scale organizations with learners in different geographical areas or for people with disabilities.

### MORE DYNAMIC LEARNING

The wide variety of learning material (web pages, pdf, slideshows, videos...), the interactive teaching tools (quizzes, wikis, lessons, glossaries...), the integrated communication tools (private messaging, forums, chat...) – all make for a stimulating, modern, and dynamic learning experience.

### HIGHER ACHIEVEMENT RATES

Learners' scores on tests, certifications or other evaluations are higher than with conventional ways of teaching. As is their ability to apply new knowledge or processes on the job or to retain information in the long run.

### COST EFFECTIVE SOLUTION

With e-learning, each time the course is accessed your return on investment improves because you are dividing the fixed production costs by number of uses. You also have savings through decreased travel, reduced material, and improved performance.

## We offer

- CONSULTING – We help you elaborate an e-learning strategy.
- WEB PLATFORMS – We implement Learning Management Systems, under license or open source (ie. Moodle).
- CONTENT INTEGRATION – We add your learning material and set up your learning activities.
- TRAINING – We train your personnel (platform Administrators and teaching personnel) onsite or through web-based tutorials.
- IT OUTSOURCING – We can host and administer your platform on our servers.

## Projects completed

Client: CTIAA (Centre Technique des Industries Agroalimentaires)  
Country: Algeria (EU cooperation programme)
